**PRACTICAL
WOUND
MANAGEMENT
GUIDE**

PREVENTION AND TREATMENT

Table of contents

Steps to follow		
Approach		1
Basic principles / objectives		1
Prognostic		1
Results		1
Principles / Objectives		
Risk assessment		2
Wound assessment		2
Clean / remove necrotic debris		3
Eliminate / treat infection		3
Culture wound		4
Fill dead space		4
Manage exudate		4
Maintain optimal moist environment		5
Insulate		5
Protect		5
Pain management		5
Odor assessment		5
Acute / chronic wound		6
Pressure ulcers		
Classification		7
Causes		7
Intrinsic / extrinsic factors		7
Complications		7
Braden scale		8
Stage I Pressure Ulcer Algorithm		9
Stages II, III, IV Pressure Ulcer Algorithm		10
Ulcers of the lower limbs		
Characteristics		11
Arterial Ulcer Algorithm		12
Venous Ulcer Algorithm		13
Doppler / ankle brachial index		14
Compression for venous ulcers		15
Diabetic ulcer		
Modified Wagner classification		16
Monofilament test		16
Neuropathic pain		16
Interdisciplinary care		16
Diabetic Ulcer Algorithm		17
Surgical wound		
Closed Surgical Wound		18
Open Surgical Wound		18
Wound healing process		19
Complications		19
Burn		20
Interdisciplinary Products		21
Cleansing products		22
Hydration products		22
Moisture retentive products		23
Absorbant products		24
Antimicrobial products		26
Debriding products		27
Odour management products		27
Other specialized products		28
Non adhesive products		29
